## RISK FACTORS

- **Offering Risk.** An investment in CNL Strategic Capital, LLC is considered speculative and involves a high degree of risk, including the loss of all or a substantial amount of your investment. CNL Strategic Capital's offering is on a best-efforts basis. There is no guarantee that CNL Strategic Capital will raise sufficient funds; therefore, it may not be able to acquire targeted assets, which reduces diversification and increases the potential of volatility.
- **Investment Objective Risk.** There is no assurance the investment strategy or objectives of CNL Strategic Capital will be achieved. Inability to invest the net offering proceeds on acceptable terms, consistent with the business strategy and within the time frame contemplated by the offering may exist. CNL Strategic Capital may face risks with respect to the evaluation and management of future acquisitions.
- **Undue Reliance on Managers or Past Performance.** CNL Strategic Capital Management, LLC is acting as the manager. The sub-manager is Levine Leichtman Strategic Capital, LLC, an affiliate of Levine Leichtman Capital Partners, LLC (LLCP). Each managing entity is an investment adviser registered with the U.S. Securities and Exchange Commission. Investors should not rely on the past performance of the managers and their respective affiliates as an indication of future performance. CNL Strategic Capital is a different investment vehicle with fees and risks dissimilar to the managers' other funds and this is the first time the managers have partnered together.
- **Conflicts of Interest Risk.** CNL Strategic Capital's managers and their respective affiliates face conflicts of interest, including those that result from compensation arrangements and allocations of business opportunities. See the prospectus for details. CNL Strategic Capital pays substantial fees and expenses to the manager, the sub-manager, the managing dealer or their respective affiliates. These payments increase the risk that investors will not earn a profit on their investment. In certain cases, CNL Strategic Capital will invest alongside the sub-manager, its affiliates and third parties. Co-investing with other investment groups will increase the risk that third parties may make decisions with which CNL Strategic Capital does not fully agree. CNL Strategic Capital will not purchase these businesses unless a majority of the independent directors determines the transaction is fair and reasonable.
- **Inability to make Distributions Risk.** Distributions are not guaranteed in frequency or amount. Distributions paid are not solely based upon performance. Distributions may be funded from multiple sources, including but not limited to, offering proceeds, borrowings, net investment income and expense waivers. Distributions that are not derived from net income produced by performance may not be sustainable and may dilute investors. Subject to certain conditions being met, CNL Strategic Capital is obligated to repay expense support to the managers over several years, which will reduce future income available for distributions.
- **Use of Leverage Risk.** CNL Strategic Capital's strategy is to use fund leverage in an amount not to exceed 35% of its gross assets; however, CNL Strategic Capital may exceed the 35% at any time, if approved by a majority of its independent directors. Separate from the fund's leverage, certain businesses in its portfolio have third-party debt. The use of leverage and its limits are subject to change.
- **Valuation Risk.** Asset valuations will be estimates of fair value, which is calculated from CNL Strategic Capital's financial statements prepared in accordance with GAAP, and do not represent the amount an investor would receive now or at any time in the future. CNL Strategic Capital's estimate of

fair value for the portfolio is inherently subjective, and the net asset value (NAV) may not accurately reflect the actual price at which its assets could be liquidated. The realized value of shares will be dependent upon market conditions that are beyond anyone's ability to control or predict.

- **Liquidity Risk.** An investment in CNL Strategic Capital is illiquid. Shares sold in this offering will not be listed on an exchange or quoted through a quotation system for the foreseeable future, if ever. If investors are able to sell their shares, they may receive less than their purchase price. The share repurchase program has numerous restrictions and offers redemptions up to 2.5% of CNL Strategic Capital's aggregate NAV per calendar quarter and up to 10% of the aggregate NAV for the prior four quarters. The board of directors may suspend or modify the program at any time.
- **Past performance is not indicative of future results.**
- An investment in CNL Strategic Capital does not provide investors with a direct ownership interest in the underlying businesses. Controlling interests in privately held businesses, by nature, pose certain incremental risks as compared to public companies, including less access to capital, reduced financial reporting transparency and fewer regulations, which could impact the complex business valuations.
- CNL Strategic Capital will be dependent upon earnings and cash flow from the businesses it acquires in order to generate earnings and cash flow to, first, satisfy its financial obligations and second, to make distributions to shareholders.
